

Veritas Enterprise Vault 11.x: Implementation and Deployment (DP0149)

Durée : 04 jours.

Ref : VE-DP0149

Formateur : certifié

A qui s'adresse cette formation

This course is meant for Symantec technical support personnel, Sales engineers, Symantec partners who support and implement Enterprise Vault and Symantec customers using Enterprise Vault.

Pré-requis

This course requires you to possess working knowledge of the networking, Exchange and Active Directory.

Objectifs

- Provide product overview, introduces how to design
- Enterprise Vault in different target situations
- Describes pre-installation tasks for Enterprise Vault, installation and post-installation tasks
- List the steps to configure Enterprise Vault, indexing and storage
- Configure Exchange mailbox archiving, and Enterprise Vault access for Exchange clients
- Configure Exchange Journal archiving
- Configure FSA
- Configure SharePoint archiving
- Describe basic

Contenu

Enterprise Vault: Product Overview

- Module Duration: 60 minutes
- Describe the business challenges addressed by Enterprise Vault
- Describe the basic concepts behind the Enterprise Vault system
- Describe the Enterprise Vault structure and components

Introduction to designing an Enterprise Vault deployment

- Module Duration: 30 minutes
- Describe the main steps to deploy Enterprise Vault
- Describe the main considerations when designing an Enterprise Vault deployment
- Describe Enterprise Vault designs for common deployment scenarios

Preparing the environment for installing Enterprise Vault

- Module Duration: 45 minutes
- Describe the installation prerequisites for the Enterprise Vault server
- Describe the additional installation prerequisites required for Exchange archiving
- Describe the additional installation prerequisites required for file system archiving
- Describe the additional installation prerequisites required for SharePoint archiving
- Use the Deployment Scanner to confirm that all the prerequisites have been installed and configured correctly

Installing Enterprise Vault

- Module Duration: 30 minutes
- Use the Enterprise Vault install launcher to install Enterprise Vault
- Complete post-installation tasks
- Uninstall or reinstall Enterprise Vault

Configuring the Enterprise Vault

- Module Duration: 45 minutes
- Run the Enterprise Vault configuration wizard
- Configure site settings to meet specific requirements
- Deploy roles-based access (RBA) for administration access
- Configure monitoring and reporting

Configuring Indexing and Storage

- Module Duration: 45 minutes
- Describe the steps required to configure indexing
- Create retention categories to meet defined requirements
- Create storage to meet defined requirements

Configuring Exchange Mailbox Archiving

- Module Duration: 60 minutes
- Configure Exchange targets
- Define how and when archiving occurs
- Process Exchange mailboxes
-

Configuring Exchange Clients Part I

- Module Duration: 45 minutes
- Configure the Outlook 2010 client
- Configure OWA
- Configure access for the Office Mail App
- Configure Vault Cache and Virtual Vault
-

Configuring Exchange Clients Part II

- Module Duration: 45 minutes
- Deploy Mail Client and configure IMAP access
- Provide an overview of Enterprise Vault Search

Configuring Exchange Journal Archiving

- Module Duration: 30 minutes
- Configure Exchange targets
- Define how and when archiving occurs
- Process Exchange mailboxes
- Process Journal mailboxes

Configuring FSA

- Module Duration: 60 minutes
- Configure FSA targets
- Define FS archiving
- Process items

Configuring SharePoint

- Module Duration: 30 minutes
- Configure SharePoint targets
- Define SharePoint archiving
- Process items

Troubleshooting the Implementation

- Module Duration: 30 minutes
- Review the installation logs
- Outline common implementation issues
- Use common troubleshooting tools
- Use common troubleshooting resources

Validating the environment

- Module Duration: 30 minutes
- Test archiving and access
- Complete all documentation
- Outline a backup schedule for Enterprise Vault

SUPPLEMENTAL MODULES

- Installing Enterprise Vault in a Domino environment (Module Duration: 45 minutes)
- Describe how Domino archiving works in order to understand the prerequisites required

Describe additional prerequisites required for Domino archiving

- Configuring Domino Mailbox Archiving (Module Duration: 60 minutes)
- Configure Domino targets
- Define when and how archiving occurs

Process Domino mailboxes

- Configuring Domino Clients (Module Duration: 45 minutes)
- Validate user access

Configure access for Domino clients

- Configuring Domino Journal Archiving (Module Duration: 45 minutes)
- Configure Domino Journal archiving
- Process Domino Journal items
